

SHIVANI JAYSHWAL

Full Stack Developer

Noida, India • +91 9936074690 • shivanijai1201@gmail.com • linkedin.com/in/shivani-jayshwal • github.com/Shivanijai1201

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years building production applications across real estate, EdTech, and healthcare domains. Experienced in end-to-end feature delivery including component architecture, REST API design, state management, authentication (JWT and RBAC), and AI integration using RAG pipelines and LLM APIs. Boosted application performance by reducing page load times by 40% and cutting manual effort by 30% through automation.

TECHNICAL SKILLS

Frontend: React.js, React Native, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, Responsive Design

Backend: Node.js, Express.js, REST API Design, JWT Auth, RBAC, Middleware, Error Handling

Database: MongoDB (schema design, indexing, aggregation)

AI / ML: RAG Pipelines, LLM Integration, OpenAI API, Groq API, Prompt Engineering, Pinecone

Testing & Automation: Playwright, Browser Automation, Chrome Extension APIs

Tools & Deployment: Git, GitHub, Postman, Render

WORK EXPERIENCE

Software Engineer — AlgoFolks Private Limited

Aug 2024 – Present

- Shipped production applications end-to-end — requirement analysis, component design, API contracts, and release — using React.js, React Native, JavaScript, Node.js, and Express.js, delivering 15+ features across 3 products.
- Architected RESTful APIs with proper resource modeling, HTTP semantics, and versioning, securing 100% of endpoints with JWT + RBAC role-scoped middleware across all products.
- Built and maintained a shared UI component library (30+ components) with clear prop interfaces, reusability patterns, and consistent design tokens — reducing new-feature dev time by 25% across 4 teams.
- Integrated RAG pipelines and Groq LLM API into 3 products — managed vector embeddings, retrieval relevance tuning, and prompt engineering to serve context-aware answers in under 2 seconds.
- Optimized cross-browser performance through lazy loading, code splitting, memoization, and asset delivery tuning — cutting average page load time by 40%.
- Automated full-cycle QA with Playwright scripts using human-like interaction patterns and rotating proxies — eliminating ~10 hrs/week of manual testing and reporting effort.

KEY PROJECTS

Broker Gully — Real Estate Platform

React.js, React Native, Node.js, Express.js, MongoDB, JWT

- Modeled the data layer and REST APIs for broker profiles and property listings, with indexed queries on location, region, and budget for low-latency filtering.
- Developed a real-time chat and lead-management module using WebSockets; engineered message persistence and delivery logic, cutting lead response time by 50%.
- Launched a React Native mobile app (Android and iOS) sharing core business logic with the web client; implemented JWT refresh-token flows and role-based navigation for brokers and buyers.

Padhai247 — EdTech Learning Platform

React.js, Node.js, Express.js, MongoDB, REST APIs

- Scaled a full-featured EdTech platform with live classes, study materials, and assessments, backed by Node.js/Express.js APIs and MongoDB.
- Designed an AI-powered recommendation engine that personalizes live class schedules and test management based on each student's progress, performance, and skill level — increasing course completion by 20%.
- Hardened the platform with authentication, role-based access control, and course management modules; built responsive React.js interfaces with optimized state management and REST API integration.

ADHD Rapid Care | Education

React.js, Node.js, Express.js, MongoDB, REST APIs, JWT

- Built an accredited online ADHD nursing CPD course platform for nurses — 10 self-paced modules with 10+ hours of content aligned to Australian clinical standards — using React.js front-end and Node.js/Express.js REST APIs.
- Developed the full enrolment flow — course landing pages, login/registration, checkout with split-payment options, and Stripe payment integration — with JWT and RBAC access control across student and admin dashboards.
- Implemented per-user progress tracking, module unlocking, and CPD completion certificates, with MongoDB schemas modeling courses, modules, and enrollments.

EDUCATION

Galgotias University

Master of Computer Applications (MCA)

Greater Noida, Uttar Pradesh

2022 – 2024

Swami Atulanand Hindu Mahavidyalaya

Bachelor of Science — PCM

Varanasi, Uttar Pradesh

2019 – 2022
